

# COMPANY PROFILE

Updated: 25 February 2019

SCOOTA's mission is to make cities and communities more livable by reducing traffic, and carbon emissions.

The company offers electric scooters to meet urban commuters' demands and solving the first/last mile problem. With their e-scooters, SCOOTA gets people wherever they need to go – whether its commuting to work, going to class, running errands, going to the beach or exploring the city.

Since November 2018, users can find SCOOTA at selected locations in major cities in Thailand. SCOOTA has been the first mover in e-scooter rental and sharing in August 2018.

SCOOTA was founded in Bangkok, Thailand, on the idea to make urban mobility smart, resourceful and fun. The founding team consists of tech and mobility enthusiasts who are passionate about smart cities and urban mobility. SCOOTA is focusing on building a diverse, high-performing team with local and international talent. The current team comprises >10 employees in their headquarter in Bangkok and other locations in Thailand.

SCOOTA has currently several hundred e-scooters on Thailand's roads, and their fleet and network is expanding rapidly. The ambition is to provide SCOOTA's services in all major cities in Thailand in 2019.

The company is looking forward to contributing to reduce carbon emissions with a fun, easy-to-use and fast mode of transportation. In a couple of weeks, the company will launch a brand-new and intuitive ridesharing app which will deliver a superior experience to their users.
